# CARDSONLINE

CardsOnline Status Check

Create your own interactive IDs

CARDSONLINE STATUS CHECK

Create an interactive printed or digital card with CardsOnline Status Check. Status Check allows you to add a QR-code to your printed or Digital ID Card. This QR-Code contains a unique link that displays a Status Check Template with an up-to-date status of a data field configured in CardsOnline.

Status Check: scan & get feedback

Quickly check if scanned data is true or false for a card holder. This could be for access to an event or to check a certain standing of a person.

Design, produce, identify & verify

With Status Check, CardsOnline offers the complete circle: design, produce, identify and now verify data on your card or digital ID.

Works on any type of design

A Status Check link can be added to a QR-code on any type of design. So it will work on a printed card, a Digital ID as PDF or as a Wallet Pass.

Bind data fields

Bind CardsOnline data fields to the dynamic fields available in a Status Check Template.
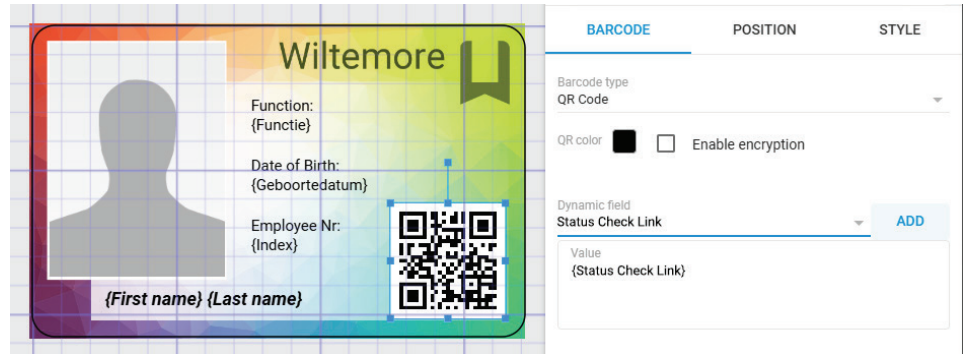

Standard or Custom Templates

Select one of the Status Check templates in the list, for example, to check the status of training certifications, membership, academic standing, special access or let us create a custom template specific to your wishes.

SCREEN CHECK

STATUS CHECK LINK

To get started with Status Check,
a card design is needed with a QR-code.
A Status Check link can be added to a
QR-code on any type of design. So it
will work on a printed card, a Digital ID
as PDF or as a Wallet Pass.

Click on the QR-code element in the
card design, go to the element
properties and select the "Status Check
Link" field from the available dynamic
fields. Add the {Status Check Link} to
the value of your QR-code and save your
card design.

STATUS CHECK BINDING

Link your card design with the Status Check QR-code to
one of the available Status Check templates. Click on
the bind icon of the design and select the needed
template, for example, to get simple yes or no feedback,
to check the status of training certifications, member-
ship, academic standing, or special access. The
preview of a selected template shows an example of
positive feedback or negative feedback. Each template
has a different setup for validation and available
dynamic fields to bind to your CardsOnline data fields.

DEMO REQUEST

CardsOnline offers the
solution for designing,
producing and managing
cards at an unlimited
number of locations
using one online system.
